## HALF-YEAR RESULTS 2017

La Hulpe, 31 August 2017

“ We finish the first half of 2017 with a consolidated net result of **€16.75** million. This result has been generated principally by the sale of the Vaci Greens buildings (A and B) and the margin generated on pre-sold projects, both office and residential.

This year again, the business portfolio, which has **17** projects spread over **10** cities, provides a diversification of sources of revenue and the visibility of future results. ”
